FOR IMMEDIATE RELEASE

Precision Laboratories Introduces Secure™ WDG

Northbrook, IL, November 5, 2002 – Jim Reiss, director, Ag Business Unit, Precision Laboratories, has announced the introduction of Secure WDG, an activator adjuvant specifically formulated for use with products or tankmixes containing Gramoxone® based herbicides. A unique combination of nonionic surfactants and HPG polymer technology, Secure WDG improves spray solution adhesion and coverage of leaf surfaces and reduces physical spray drift during application.

“This is part of Precision’s continuing focus on developing pesticide specific adjuvant technology, said Reiss. “We wanted to make a product that would improve the efficacy and optimize the performance of Gramoxone. Secure WDG does just that by providing superior drift reduction and by improving the adhesion to leaf surfaces.”

For information about this product, contact Jim Reiss at (800) 323-6280 or email at info@precisionlab.com.

Precision Laboratories' Ag Business Unit, based in Northbrook, Illinois is a manufacturer and marketer of innovative, value-added agricultural adjuvant technologies. The company's best of class product lines include a wide range of adjuvants, seed coating polymers, colorants, and marking foam technologies.
