Precision Laboratories Receives Registration for Cascade™ Plus in Canada

Northbrook, IL, March 17, 2003 -- Rick Wohlner, president, Precision Laboratories today announced that its premier wetting agent, Cascade Plus has received registration in Canada and will be available to golf course superintendents and specialty turf managers this Spring.

Cascade Plus is a long-lasting wetting agent that has been shown to help conserve water by making soil more irrigation efficient, effectively moving water into the soil profile to create better root systems and more resilient turf. Cascade Plus rewets easily and allows superintendents to maintain firm and fast playing surfaces. Through extensive use and research, a single application of Cascade Plus has been proven to prevent and counteract localized dry spot and hydrophobic soils for 4 to 6 months.

For more information, contact www.precisionlab.com or call 1-800-323-6280.

Precision Laboratories, based in Northbrook, Illinois is a manufacturer and marketer of value-added specialty chemicals used to improve the performance and playability of turf, by enhancing growing conditions, pesticide efficacy and turfgrass quality. The company's best of class product lines include soil conditioners, adjuvants, additives, spray pattern indicators and permanent turf colorants.
