FOR IMMEDIATE RELEASE

## **Precision Labs Announces Regreen™ Reformulation**

Northbrook, February 12, 2003 -- Rick Wohlner, president, Precision Laboratories today announced the reformulation of Regreen, a nonphytotoxic turfgrass colorant. The changes in the product include a more concentrated solution that provides more color at lower usage rates. In addition, the reformulation has been shown to bind to turf for a longer period of time with minimal ruboff or staining. Precision's Regreen can be applied to both dormant and nondormant turfgrasses for a long-lasting, natural color without tank mixing. It is available in 2.5 gallon containers.

For more information about Regreen or other Precision Laboratories' products, please call 1-800-323-6280 or visit the company's website at [www.precisionlab.com](http://www.precisionlab.com).

Precision Laboratories, based in Northbrook, Illinois is a manufacturer and marketer of value-added specialty chemicals used to improve the performance and playability of turf, by enhancing growing conditions, pesticide efficacy and turfgrass quality. The company's best of class product line includes soil conditioners, adjuvants, additives, spray pattern indicators and permanent turf colorants.
