

Improved PGR Results

Results. Expect it..

SYNC[®]
FUNGICIDE ACTIVATOR

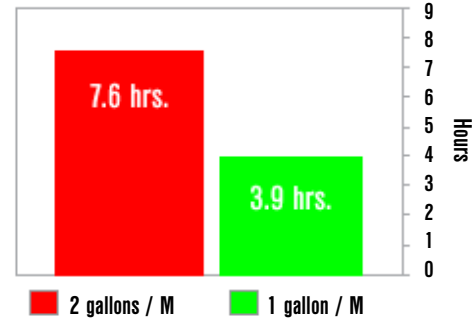

is proven to provide superintendents with better performance and added longevity from their fungicide applications. New data proves SYNC[®] improves the performance of PGRs such as Primo Maxx[®].

"...the SYNC product tank-mixed with Primo Maxx[®] was associated with improved plant growth regulation effects versus Primo Maxx applied alone, but the addition of 5-0-0-5Fe Uptake Technology to a SYNC + Primo Maxx tank-mix, or also a 5-0-0-5Fe + Primo Maxx tank-mix, helped to reduce any turf phytotoxicity side-effects from the plant growth regulation observed in this field trial ..."

Less Time, Water & Labor

Effect of Spray Volume on Application Time
30 Acres of Fairways

Clipping Reduction – Penn State

SYNC is a registered trademark and UPTAKE TECHNOLOGY is a trademark of Precision Laboratories, Inc.
Primo Maxx is a registered trademark of Syngenta Corp.

"We are getting full control at lower spray volumes. The turf is staying disease free, it's thriving. SYNC is doing everything you expect and want it to do. SYNC is a necessity in my program, and it's very economical, too. I figure it adds less than \$9 per acre. In my opinion, adding SYNC to your spray program is a no brainer."

-Matt Kregal, Golf Course Superintendent
The Club at Strawberry Creek

SYNC is a unique, proprietary adjuvant technology proven to enhance the performance of both contact and systemic fungicides, and to lengthen disease control at reduced water volume on a wide variety of turf diseases.

Precision Laboratories is a leading provider of specialized chemistries applied to plants, seeds, soil and water to maximize resource and biological performance potential while stewarding the environment.

Specialized Chemistry for Green Industries
