FOR IMMEDIATE RELEASE

## **SYNC™ Activator Adjuvant Introduced by Precision Laboratories, Inc.**

October 5, 2005, Waukegan, IL – Precision Laboratories, Inc. has introduced, SYNC, the first activator adjuvant specifically designed for the turf industry to enhance the performance and lengthen the disease control of systemic and contact fungicides, at reduced spray carrier volumes.

Unlike ordinary adjuvants, SYNC's proprietary adjuvant technology is comprised of a two-part surfactant system with a pH buffer to ensure optimized fungicide uptake and increased fungicide performance.

“SYNC takes a quantum leap over the old-fashioned concepts of spreaders and stickers as the preferred adjuvant for fungicides,” says Don Spier, Vice President, at Precision Laboratories. “Our development efforts have shown that SYNC consistently improves fungicide performance and longevity. We have seen improved turf health and significant differences in performance in water volumes as low as one gallon of water per thousand square feet. For turf professionals facing a wide range of disease pressures, SYNC provides a significant return on their fungicide investment by saving time, labor and money.”

Additional information regarding SYNC is available by contacting Precision Laboratories' Customer Service Team at 800-323-6280 or by visiting the company's website at [www.precisionlab.com/sync](http://www.precisionlab.com/sync).

Precision Laboratories, Inc., based in Waukegan, Illinois is a manufacturer and marketer of high performance specialty chemicals used to improve the performance and playability of turf. The company's best-of-class products include adjuvants, soil surfactants, turf and aquatic colorants and swath and spray pattern indicators.
