Cascade Plus™ Improves Fungicide Performance on Fairy Ring

Cascade ^{Plus}™
DEEPER ROOTS

Specialized Chemistry for Green Industries

Situation

- Controlling Fairy Ring is difficult because the soil becomes impervious to water.
- Fungicides must penetrate the thatch and move into the soil to achieve satisfactory disease control.

Prostar – 4.5oz / 1000

No surfactant

2x/28 day

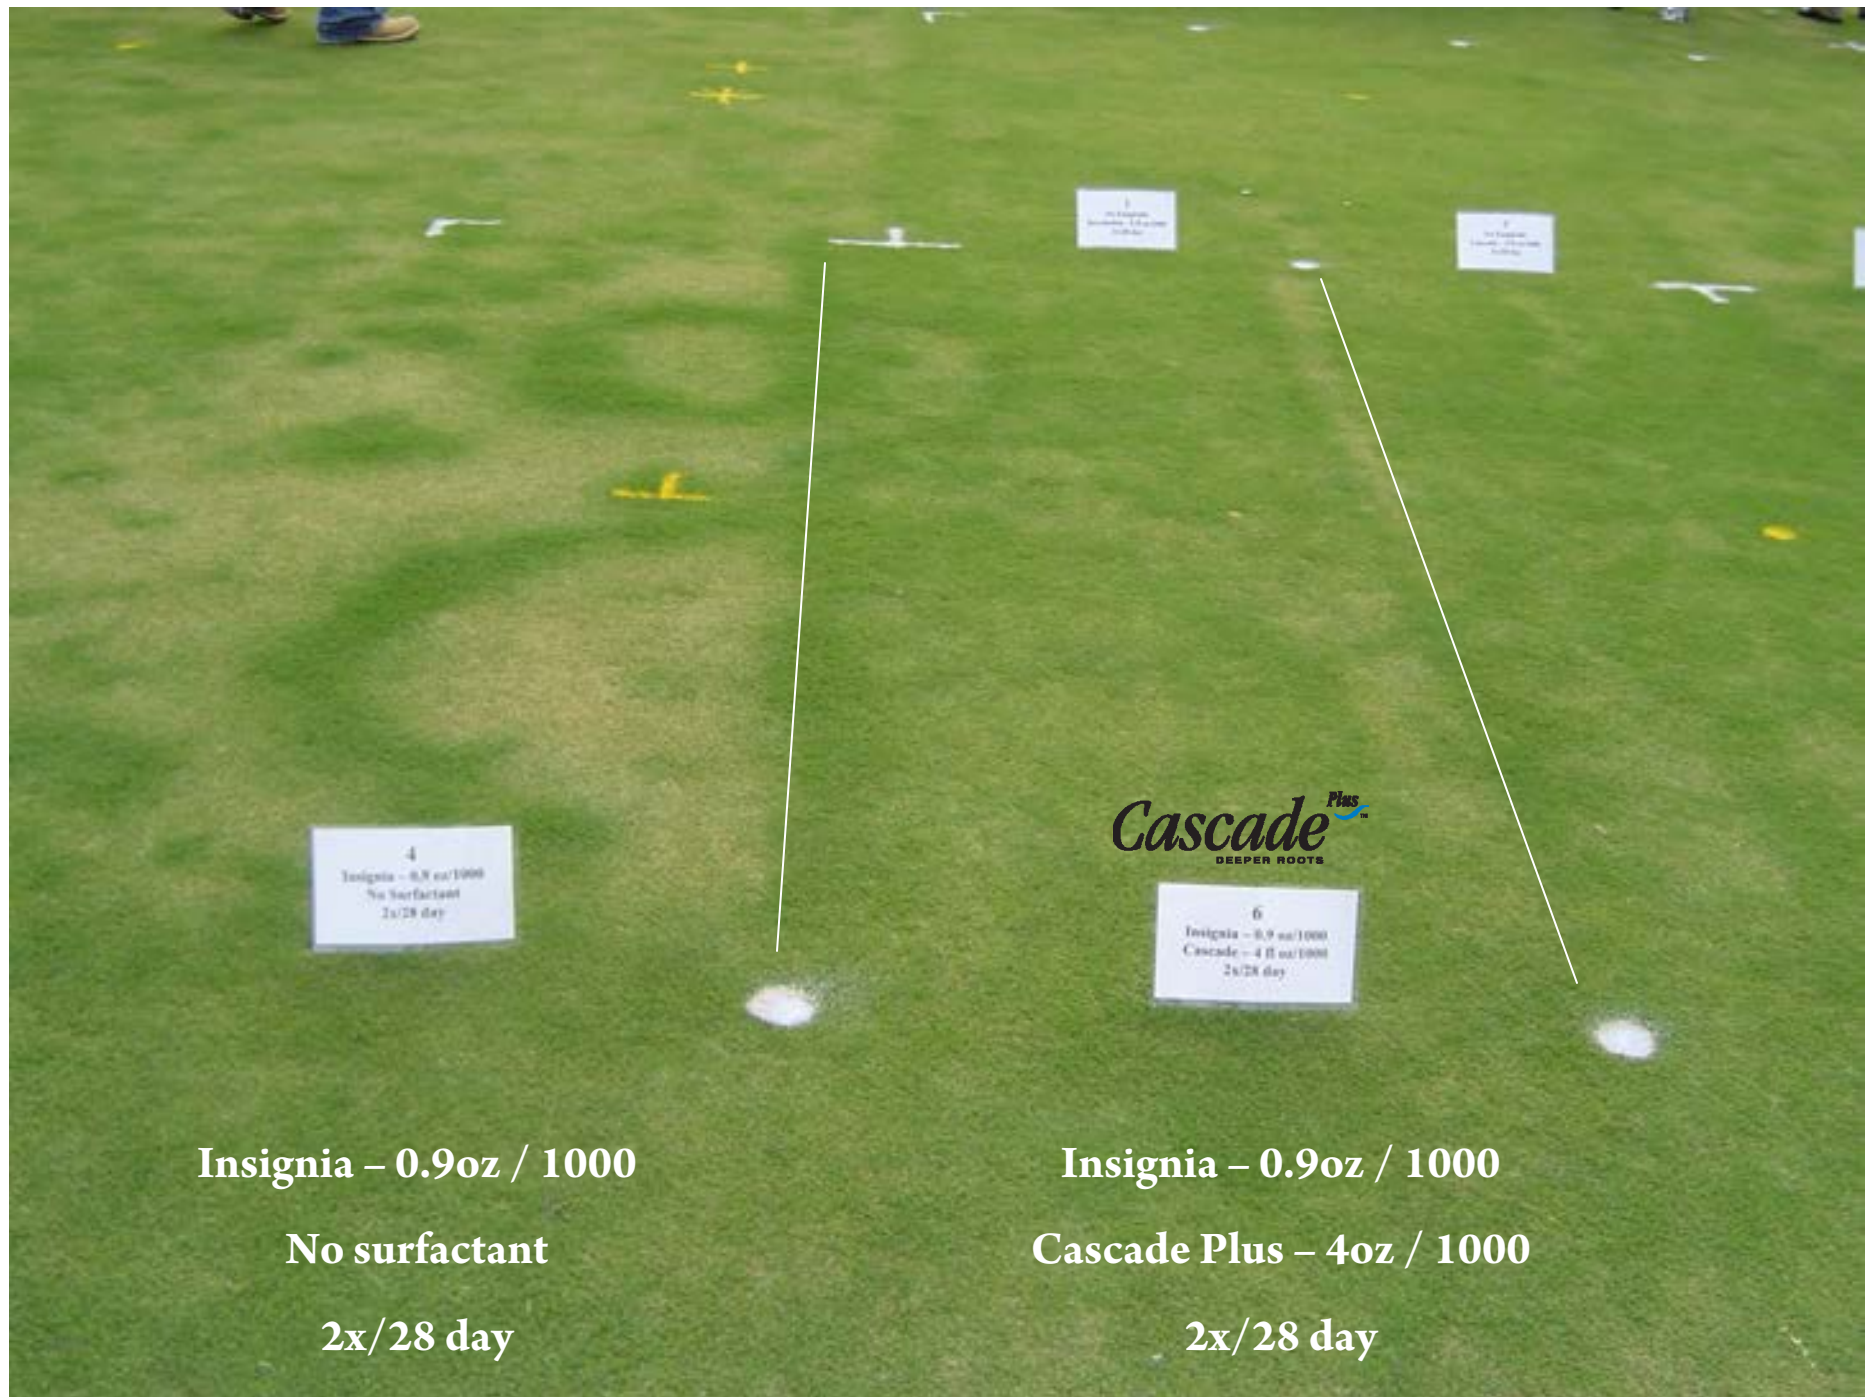

Prostar – 4.5oz / 1000

Cascade Plus- 4oz / 1000

2x/28 day

Solution

- This trial shows that tank mixing Cascade Plus™ with a fungicide can improve the efficacy of the fungicide against Lycoperdon Fairy Ring.
- There was little phytotoxicity associated with the Cascade Plus™ treatments or any of the combinations containing Cascade Plus with fungicides.

2x/28 day

Insignia - 0.9oz / 1000

Cascade Plus - 4oz / 1000

2x/28 day

Conclusion

Adding Cascade Plus to your Fairy Ring control program increases the return on dollars that you have invested in fungicides.
