

CHEM-STIK™

NONIONIC SPREADER STICKER

CHEM-STIK™ is an easy to use, nonionic spreader-sticker formulated to improve leaf surface coverage of spray solutions and wash-off protection from untimely rainfall. CHEM-STIK will increase wetting, adhesion and endurance of pesticide sprays when used as directed.

WHAT MAKES IT BETTER:

- Increases wetting, adhesion and endurance of pesticide sprays
- Improves spray solution coverage on leaf surface
- Easy to use formulation that won't gum up sprayers like ordinary spreaders/stickers
- Low use rates

USE RATES

- As a general guide, use 4–8 ounces per 100 gallons of spray solution. Higher rates may be used when conditions require additional sticking properties. Rates up to 16 ounces per 100 gallons will optimize the sticking of pesticides.

PACKAGING

- 4 x 1 gallons per case
