

CHEM-STIK™

NONIONIC SPREADER STICKER

CHEM-STIK™ is an easy to clean out, nonionic spreader-sticker formulated to improve leaf surface coverage of spray solutions, while providing wash off protection from untimely rainfall. When used as directed, CHEM-STIK will increase wetting, adhesion, and endurance of pesticide sprays. This is especially beneficial during windy and rainy periods, as well as under other adverse weather conditions.

WHAT MAKES IT BETTER:

- Increases wetting, adhesion and endurance of pesticide sprays.
- Improves coverage of the spray solution on leaf surface.
- Easy to clean out formulation that won't gum up sprayers like ordinary spreaders/stickers.
- Low use rates

USE RATES

- As a general guide, use 4–8 ounces per 100 gallons of spray solution. Higher rates may be used when conditions require additional sticking properties. Rates up to 16 ounces per 100 gallons will optimize the sticking of pesticides.

PACKAGING

- 4 x 1 gallons per case
