DOMINO™ FOR TABLE GRAPES

What if you could . . .

Increase berry weight?

Increase berry firmness?

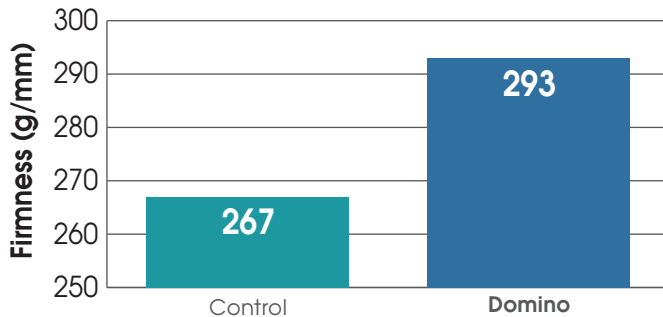

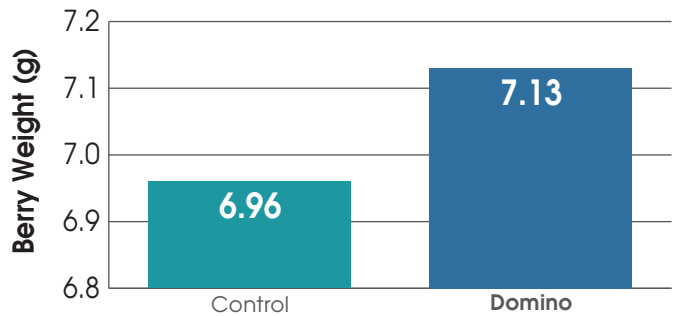

Increase sugar content?

2.4%

Increased berry weight with DOMINO

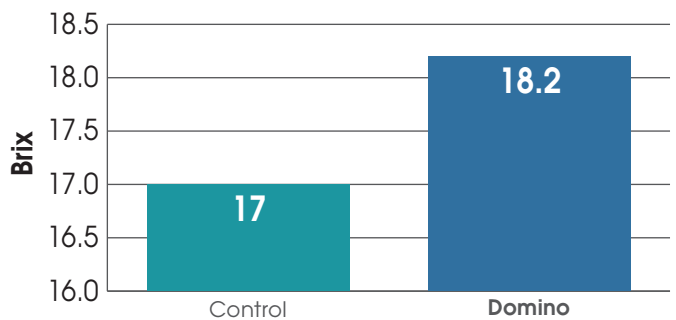

10%

Increased berry firmness with DOMINO

7%

Increased sugar content with DOMINO

Research was conducted by Ashraf El-kereamy, University of California Cooperative Extension, on Royal Scarlet table grapes grown on a sandy loam soil during hot, dry conditions. Domino was injected through drip irrigation at an initial rate of 1 quart per acre, followed by subsequent injections at 1 pint per acre. Domino was injected in three-week intervals for a total of six applications. Domino is a trademark of Precision Laboratories, LLC
