## 4. FIRST AID MEASURES

---

**IF SWALLOWED:** Call a POISON CENTER/doctor or Chemtrec if person feels unwell. Rinse mouth. Have person sip a glass of water if able to swallow. Do NOT induce vomiting, unless told to by a poison control center or doctor. Do not give anything to an unconscious person.

**IF ON SKIN:** Wash affected area with plenty of soap and water. Use tepid water if available. If skin irritation occurs: Get medical advice or attention. Treat symptomatically. Take off contaminated clothing and wash it before reuse.

**IF INHALED:** Move person to fresh air. If person is having difficulty breathing, give oxygen. If not breathing, give artificial respiration.

**IF IN EYES:** Rinse cautiously with water for several minutes. Remove contact lenses, if present and easy to do. Continue rinsing. If eye irritation persists: Get medical advice or attention.

**Medical Conditions Aggravated by Overexposure:** Repeated or prolonged exposure is not known to aggravate medical condition.

**Other Effects:** This product is not a carcinogen by NTP, OSHA and ACGIH.

---

## 5. FIREFIGHTING MEASURES

---

**Suitable Extinguishing media:** Carbon dioxide or dry chemical for small fires. Foam (alcohol, polymer or ordinary), and wear fog spray for large fires.

**PPE and Precautions:** Fire fighters should wear NIOSH/MSHA approved self-contained breathing apparatus and full protective clothing. Cool fire-exposed containers with water spray.

**Additional Fire and Explosion Data:** Thermal degradation yields ammonia and sulfur trioxide. Like most dry chemicals, a potential dust explosion exists if the dust concentration in the air is too high. Good housekeeping procedures and sound engineering practices are required to reduce this potential hazard. (1) This material would not ignite at energies up to 40 joules, the highest tried. This material would ignite when subjected to a 24-watt continuous arc. (2) In larger vessels, explosion may occur at lower dust concentrations.

---

## 6. ACCIDENTAL RELEASE MEASURES

---

**In Case of Spill:** Evacuate the spill area, except for cleanup personnel. Wear NIOSH/MSHA-approved respirator and protective equipment. Control spill with adsorbent pads or booms. Recover free liquid. For recovery or disposal, add inert absorbent (sand, earth, sawdust, etc.) to spill area and shovel into containers for disposal.

**Disposal:** Product is slippery under foot; flush smooth surfaces thoroughly. Dispose of collected waste in accordance with federal, state and local regulations.

---

## 7. HANDLING AND STORAGE

---

**Precautions to be Taken in Handling:** Keep away from heat, sparks and flame. Keep container sealed when not in use. Safety goggles with full-face shield and eyewash recommended. USDA-accepted nitrile (CFR-20) or neoprene rubber (CFR-21) recommended. Wear appropriate clothing to prevent repeated or prolonged skin contact. Use only with adequate mechanical exhaust ventilation.

**Precautions to be Taken in Storage:** Product should be stored in a dry place at temperatures between 40 and 100°F. Do not store in metal containers (corrosion risk). Do not store together with food, beverage and animal feed.

---

## 8. EXPOSURE CONTROLS / PERSONAL PROTECTION
