

SIGNAL™

SPRAY COLORANT

YOU CAN SEE THE DIFFERENCE

SIGNAL is the spray colorant and landscape management tool that makes tough jobs simple--it's brighter and easier to see.

SIGNAL guarantees spray accuracy and eliminates waste due to overlapping and skipping. SIGNAL not only guides the spray path, it also indicates unwanted drifting and reduces overspray.

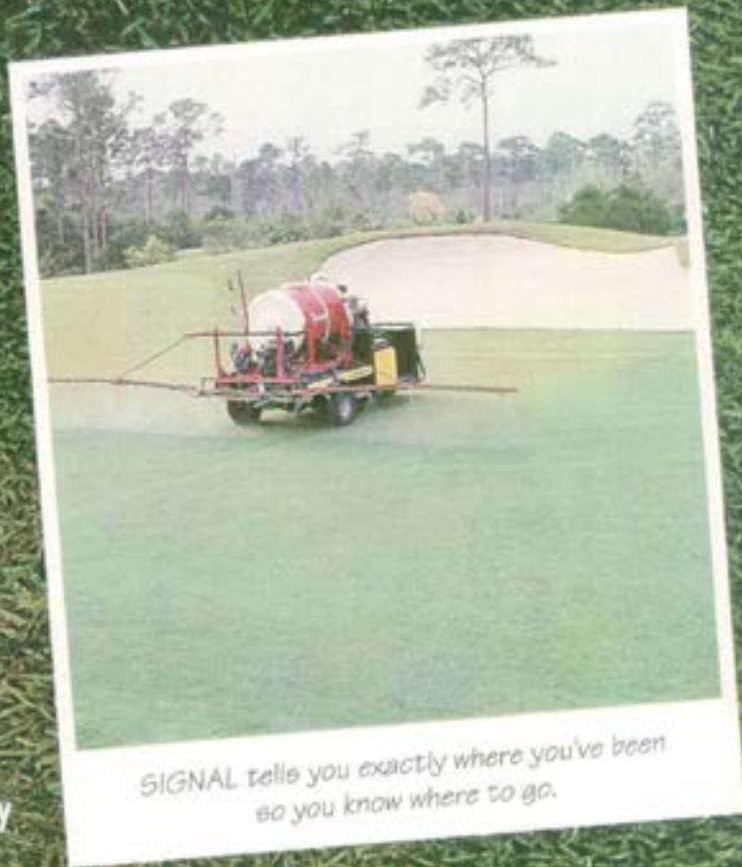

SIGNAL quickly and easily dissipates, won't permanently

stain and is perfectly compatible with all water-soluble mixtures.

Packaged in 3 convenient forms, SIGNAL is available as a liquid concentrate, as a dry formulation in water-soluble packets, or in easy-to-use tablets for small sprayers.

To do the job right--the first time--you can't afford any colorant except the best and the brightest--SIGNAL.

SIGNAL tells you exactly where you've been so you know where to go.

SIGNAL™

SPRAY COLORANT

TECHNICAL BULLETIN

SIGNAL is a highly visible, concentrated, temporary blue colorant designed to be added to liquid spray solutions. It provides visual evidence of where a spray application has been made. SIGNAL eliminates waste due to overlapping and skipping while it indicates drift and improper application.

Completely soluble with all water-based solutions, SIGNAL will not permanently stain your skin, equipment or clothing and it dissipates completely after application. SIGNAL is non-toxic and safe to use.

SIGNAL is designed for use on golf courses, parks, cemeteries, athletic fields, and any large turf or grass area. SIGNAL is also ideal for railroad, utility and highway rights-of-way and for general lawn care and landscape maintenance use.

PACKAGING:

For ease and convenience, SIGNAL may be used with any type of spray equipment. It is available in three forms:

Liquid Concentrate:
One gallon and one quart in easy to use and pour containers.

Water-Soluble Packets:
Quick-dissolving SoluPaks. Unique bag-within-a-bag system.

ADVANTAGES:

- Eliminates skips & overlaps
- Indicates spray drift & clogged nozzles
- Non-staining
- Useful for sprayer calibration
- Non-toxic, environmentally safe
- Water-soluble — totally compatible
- Will not affect chemical performance
- Temporary colorant

DIRECTIONS:

Liquid Concentrate: Use one gallon for each 400-500 gallons of spray solution. Use one quart SIGNAL for each 100-125 gallons. Add SIGNAL to spray tank when tank is approximately half full.

Water-Soluble Pack: Add one SoluPak™ to each 100-150 gallons of spray solution.

HEALTH HAZARD, DISPOSAL AND FIRST AID INFORMATION:

Keep out of reach of children. Do not take internally. In case of ingestion, drink large quantities of water and induce vomiting. Avoid eye contact. In case of eye contact, flush with cold, clean water and seek immediate medical attention. If skin contact occurs, wash with soap and water.

Users and applicators should wear chemical gloves (i.e., nitrile) and goggles.

Store liquid SIGNAL in plastic containers and protect from freezing. If liquid product should freeze, bring to room temperature and stir thoroughly. Disposal must comply with local, state and federal regulations. Do not reuse container. For further information regarding safe handling and use, refer to Material Safety Data Sheet.
