

# TACHEON™ COMPLETE

## SPREADER-STICKER

TACHEON™ COMPLETE is a silicone-based spreader-sticker designed specifically for application in horticultural and arable crops. TACHEON COMPLETE reduces the surface tension of spray solutions, resulting in more effective wetting and more uniform coverage. This means more product is retained and rainfast properties are improved compared to regular nonionic surfactants.

### FEATURES & BENEFITS:

- Up to 3 times more spreading than ordinary nonionic surfactants
- Enhanced rainfastness and efficacy in humid or wet conditions
- Less foaming in the tank for easier application
- Compatible with most pesticide tank mixes

### USE RATES:

- **General Use Rate:** 5 fl oz/A
- **Rate Range:** 4-8 fl oz/A
- Use rate and or spray volume should be adjusted based on experience and performance. Generally, TACHEON product use rate goes down as water volume goes up. Increase TACHEON product use rate when reducing water volume to achieve the same or increased level of coverage.

### PACKAGING:

- 2 x 2.5 gallons per case
