

TACHEON™ SPREAD

SILICONE SURFACTANT,
SPREADER & PENETRANT

TACHEON™ SPREAD is a 100% active organosilicone surfactant, spreader and penetrant for use in the application of herbicides, fungicides, insecticides and plant growth regulators. TACHEON SPREAD rapidly reduces spray solution surface tension and results in more effective wetting and more uniform coverage on foliar surfaces. TACHEON SPREAD readily disperses in spray solutions and is especially suited to situations where coverage is critical. TACHEON SPREAD is particularly useful in low volume spraying and aerial applications where water coverage is a limiting factor.

FEATURES & BENEFITS:

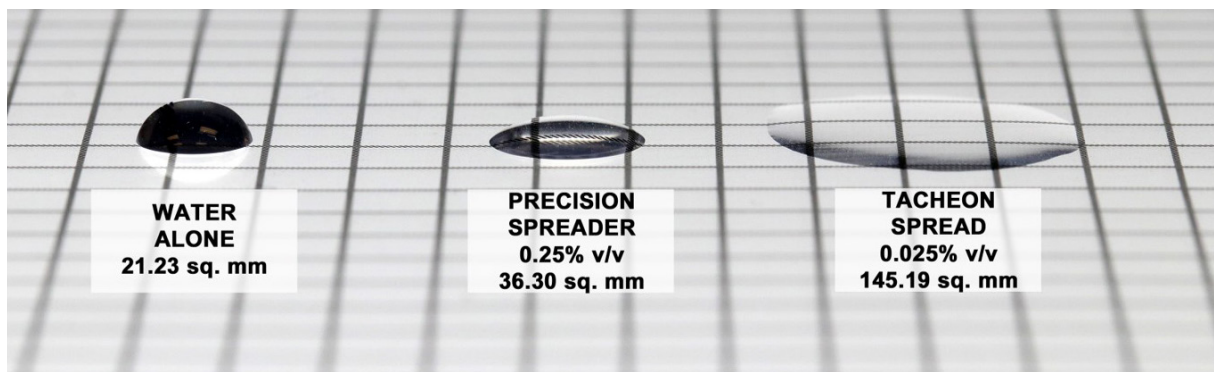

- 100% silicone technology delivers superior coverage and penetration
- Spray deposits dry quickly to resist wash-off
- Low-use rates make it easy to handle and store
- Mixes easily even under low agitation
- Easy to clean out of sprayers

PACKAGING:

- 4 x 1 gallon case
- 2 x 2.5 gallon case

USE RATES:

- **General Use Rate:** 1.5 fl oz/A
- **Rate Range:** 0.5-1.5 fl oz/A
- Use rate and or spray volume should be adjusted based on experience and performance. Generally, TACHEON product use rate goes down as water volume goes up. Increase TACHEON product use rate when reducing water volume to achieve the same or increased level of coverage.

Equal volume droplets dispensed with a VWR Signature™ Multichannel Pipettor

1 droplet = 25 μ L
