

VIVAX™ 10G

HYDRATION AND INFILTRATION

Golf course superintendents and sports turf managers work hard to provide great playing surfaces for their customers. Managing water in the root zone is important to their efforts and sometimes a touchup is all that is needed. Vivax™ 10G is a combination of four surfactant technologies, on an eco-friendly carrier, designed to manage water across a wide range of soil and turf types. It is ideal for applications on golf courses and athletic fields, especially where spraying is difficult.

WHAT MAKES IT BETTER:

- Manages water across a wide range of soils and turf types
- Effective in programs that increase microbial populations
- Moves irrigation or rainwater off the playing surface and throughout the soil
- Does not require irrigation immediately after application

Learn more at www.precisionlab.com/vivax

FEATURES AND BENEFITS:

- Contains four surfactant technologies – effective across a wide range of conditions
- Reduces surface tension – less run-off and wasted water
- Provides greater soil solubility – improved turf quality and irrigation efficiency
- Resists microbial breakdown – ideal for use in programs that increase soil microbial populations
- Uniform granular formulation – easy to apply

USE RATES

- Apply 3.5 pounds (1.6 kg) of Vivax 10G per 1,000 sq. ft. (92.9 M²) to dry turf surfaces

PACKAGING

- 42 pound (19.1 kg) bag

APPLICATION INTERVAL:

- Apply Vivax 10G every 21 to 30 days
