

High Nutrient Load

- High nutrient load
 - More nutrients per gallon
 - Less storage space per pound of nutrient
 - More acres per gallon
- Stable suspension technology
 - Extended shelf life
- 100% water soluble nutrients
 - Maximum plant uptake
 - Easy to mix with agitation
- Application flexibility
 - Excellent tank mix partner
 - Suitable for ground or aerial application
 - Low or high volume spray rates

The Adjuvant Advantage

... in the mix tank

Strong Chelating Agents

- Ensures the water solubility required for plant uptake and utilization.

Buffering Agents - Improves stability of the spray solution and provides optimum nutrient availability when tank mixing with many common crop protection products.

Miscibility - Application and handling efficiencies result from tank mixing WUXAL formulations with many common crop protection products.

... between the spray tip and the leaf

Anti-Evaporants - Achieves greater efficiency of the applied nutrients by preventing the evaporation of micro-droplets before the target is reached.

... on the leaf

Surfactants - Evenly distributes the spray solution on leaf surface to maximize efficacy and crop safety of foliar applied nutrients.

Humectants - Re-activates dried residual deposits, allowing for plant uptake over a prolonged time period.

Stickers - Greatly reduces nutrient wash-off loss due to irrigation and rainfall by holding the solution on the targeted leaf surface.
