

Calcium 10-0-0-10Ca

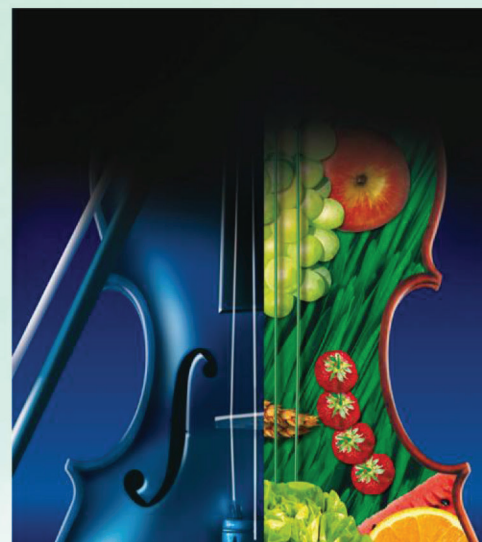

Safe and highly effective calcium supply plus foliar nutrition to fruit and vegetables

Description

Wuxal Calcium is a stable, 10% calcium formulation. It is used for crop-specific foliar nutrition to prevent or eliminate general or physiologically implied calcium deficiencies of fruit, vegetables and other specialty crops.

In addition to the high calcium content, Wuxal Calcium is a supplementary foliar nutrition with nitrogen, magnesium and other micronutrients required to achieve optimal plant growth, increased yield and improved quality.

Key benefits of WUXAL Calcium

- Especially developed for foliar nutrition.
- Calcium supply plus foliar nutrition with nitrogen, magnesium and high micronutrient content.
- Significantly higher calcium efficiency than traditional single calcium salt sprays.
- High crop safety.
- Has none of the disadvantages of common calcium sprays such as phytotoxicity at certain stages of growth, temperatures, or unsatisfactory compatibility with pesticides.
- Bio-effective additives for weather-independent uptake of calcium and all other nutrients.
- Fully chelated cationic micronutrients for excellent absorption and translocation in the plant.
- Can be applied with all usual HV and LV (LV: up to 5% of concentration) spraying and sprinkling equipment.
- Compatible with most commonly used pesticides.

GUARANTEED ANALYSIS:

Total Nitrogen (N)	10.000%
1.3% Urea Nitrogen	
8.5% Nitrate Nitrogen	
0.2% Ammoniacal	
Soluble Calcium (Ca)	10.700%
Soluble Magnesium (Mg)	1.200%
Soluble Boron (B)	0.050%
Chelated Copper (Cu)	0.040%
Chelated Iron (Fe)	0.050%
Soluble Manganese (Mn)	0.100%
Soluble Molybdenum (Mo)	0.001%
Chelated Zinc (Zn)	0.020%

The cationic micronutrients (iron, copper, manganese and zinc) are fully chelated (EDTA).

Results. Expect it.™
