

# Ferro 5-0-0-5Fe

## The new organic iron complex for prevention and control of iron deficiency

### Description

Wuxal Ferro is a newly developed organic iron complex for the prevention and control of iron deficiency in specialty crops. Wuxal Ferro is formulated as a stable suspension concentrate and is particularly suited for foliar nutrition.

The fluid suspension makes handling much easier in comparison to standard synthetic-organic metal-chelates in power formulation.

Wuxal Ferro ensures a rapid absorption by the foliage (starter effect) as well as a durative effect due to its outstanding adhesive properties.

Wuxal Ferro is very safe in comparison to conventional aminopolycarboxylate-chelates. Furthermore, iron losses by leaching are dramatically reduced because Wuxal Ferro sticks extra-ordinarily well on the foliage. These properties make the use of Wuxal Ferro much more economical than other conventional iron chelates or salts.

Wuxal Ferro is highly resistant to high pH-values of spray and soil solutions (up to pH 9).

### Key benefits of WUXAL Ferro

- The new standard in the control of iron chlorosis.
- Innovative new iron complex.
- Safe; non-burning.
- Particularly suited for foliar application.
- Highly efficient.
- Easy handling.
- Extraordinary adhesiveness and rainfastness.
- Fully biodegradable.
- Not sensitive to light.
- Non-corrosive.

Results. Expect it.™

### GUARANTEED ANALYSIS:

Total Nitrogen (N)	5.000%
5.00% Urea Nitrogen	
Chelated Sulfur (S)	3.000%
Complexed Iron (Fe)	5.000%

Additionally, Wuxal Ferro contains organic formulation additives.

The iron is 100% complexed.
