

# Microplant Mg 5-0-10

## The highly concentrated micronutrient suspension for intensive crops

### Description

Wuxal Microplant is a stable, highly concentrated micronutrient fertilizer for the targeted nutrition of intensive crops via the leaf.

The nutrients are readily available to the plants. Hence Wuxal Microplant is suitable for directly correcting acute micronutrient deficiency and for preventing the occurrence of latent deficiencies.

### Key benefits of WUXAL Microplant

- Nutrients readily available to plants with a high degree of crop safety.
- Fully chelated cationic micronutrients.
- Safe application, independent of the weather conditions.
- Superchelation improves the water quality of the spray solution.
- Contains nitrogen, potassium and magnesium as an additional nutrient source to avoid an unbalanced micronutrient supply.
- Can be applied with all usual HV and LV spraying and sprinkling equipment compatible with most commonly used pesticides.

Results. Expect it.™

### GUARANTEED ANALYSIS:

Total Nitrogen (N)	5.000%
3.6% Urea Nitrogen	
1.4% Ammoniacal	
Soluble Potassium (K <sub>2</sub> O)	10.000%
Soluble Magnesium (Mg)	1.800%
Soluble Sulfur (S)	5.200%
Soluble Boron (B)	0.300%
Chelated Copper (Cu)	0.500%
Chelated Iron (Fe)	1.000%
Soluble Manganese (Mn)	1.500%
Soluble Molybdenum (Mo)	0.010%
Chelated Zinc (Zn)	1.000%

The cationic micronutrients (iron, copper, manganese and zinc) are fully chelated (EDTA).
