

NIS 90:10™

HUMECTANT AND NONIONIC SURFACTANT

NIS 90:10™ is an economical, 90% active, low-foaming, non-ionic activator adjuvant that enhances crop protection performance by improving spray solution coverage and penetration of target leaf surfaces.

FEATURES & BENEFITS:

- Optimum HLB level for enhanced performance across a wide range of herbicides
- Excellent wetting and spreading on tough-to-cover leaf surfaces
- Contains humectants to extend uptake time for more consistent performance
- Easy-to-use, defoamed formulation
- Nonflammable
- Noncorrosive

USE RATE:

- 0.125-0.5% v/v 1-4 pt/100 gal of spray solution

PACKAGING:

- 2 x 2.5 gallons per case
- 275 gallon minibulk
