

SEEDZONE IF®

Nutrient Management Aid

CONTAINS NONPLANT FOOD INGREDIENTS

ACTIVE INGREDIENT:

25.0% Cellulose, carboxymethyl ether, potassium salt

INERT INGREDIENTS:

75.0% Inert Ingredients (glycerol and water)

100.0% TOTAL

All ingredients are approved for use under 40 CFR 180

KEEP OUT OF REACH OF CHILDREN

NONHAZARDOUS

PRECAUTIONARY STATEMENTS

If medical advice is needed, have product container or label at hand. Read label before use. Wash protective equipment and work clothes thoroughly after handling. Specific treatment is given in the First Aid section on this label or on the SDS.

PERSONAL PROTECTIVE EQUIPMENT (PPE)

Applicators or handlers of this product should wear protective eyewear, long sleeved shirt, long pants, socks, shoes and barrier laminate, neoprene rubber, nitrile rubber or Viton® gloves. Consult the SDS for further information.

FIRST AID

If Swallowed: Rinse mouth. Have person sip a glass of water if able. Do not induce vomiting unless told to by a poison control center or doctor. Do not give any fluids to an unconscious person.

If Inhaled: Move person to fresh air. If person is having difficulty breathing, give oxygen. If not breathing, give artificial respiration.

If In Eyes: Rinse cautiously with water for several minutes. Remove contact lenses, if present and easy to do. Continue rinsing. If eye irritation persists: Get medical attention or advice.

If On Skin: Wash affected area with plenty of soap and water. Use tepid water if available. If skin irritation occurs: Get medical advice or attention.

GENERAL INFORMATION

SeedZone IF is a Nutrient Management Aid formulated to enhance the moisture environment in the applied area, providing optimal conditions for early season crop development, and improved performance of seed and crop inputs.

DIRECTIONS FOR USE

SeedZone IF may be applied to the seed furrow, or by furrow-side, y-drop, side-dress, or broadcast applications. **SeedZone IF** should be applied in 1-25 gallons per acre for all applications. **SeedZone IF** may also be applied with nutrients, pesticides, and microbial products.

USE RATE

Apply **SeedZone IF** at a rate of 16 fl oz per acre.

Always mix and apply **SeedZone IF** in accordance with the following label instructions and guidelines.

MIXING with Starter Fertilizers

For most effective mixing and dispersion, **SeedZone IF** should be thoroughly blended with starter fertilizers prior to filling tanks on planting equipment.

If mixing in tanks on planting equipment is necessary, use the following guidelines:

- 1) Tank(s) must be empty or nearly empty, having no more than 5% of the tank volume in starter fertilizer.
- 2) Add the required amount of **SeedZone IF** by aggressively pumping the fertilizer into the tank(s) so that adequate agitation is achieved and **SeedZone IF** is dispersed.
- 3) If this is not possible then mechanical agitation must be employed to disperse **SeedZone IF**.

MIXING for Broadcast Applications

For most effective mixing and dispersion, **SeedZone IF** should be added after the tank is filled with at least 25% water or UAN while maintaining agitation. Then follow mixing and loading guidelines as described on the label of other pesticides being used.

Caution: Do not add **SeedZone IF** to a partially full tank or full tank with no agitation. Product will float on top and travel through field is insufficient to provide good mixing. Once **SeedZone IF** is adequately dispersed, it will remain uniformly mixed and will not separate over time.

Caution: **SeedZone IF** can cause incompatibility when Glyphosate and 2,4-D are in the tank together with water alone. When partnering these 2 herbicides with **SeedZone IF** please add 2 times the compatibility agent recommended to ensure uniform mixing.

STORAGE AND DISPOSAL

Protect product from freezing. *If product freezes, warm to room temperature before use.* Store in original container only and do not reuse empty container. Triple rinse (or equivalent) during mixing and loading. Recycling decontaminated containers is the best option of container disposal. The Agricultural Container Recycling Council (ACRC) operates the national recycling program. To contact your state and local ACRC recycler visit the ACRC web page at www.acrecycle.org. Decontaminated containers and materials must be disposed of in a manner allowed by local, state and federal laws and regulations.

CONDITIONS OF SALE

Read the information contained herein before buying or using this product. If the stated terms are unacceptable, return the product at once, unopened. It is critical that this product be used and mixed only as specified on this label. Neither the manufacturer nor the seller makes any representation or warranty, expressed or implied, with respect to the results from the use of this material. Buyer and user assume all risks of use and/or handling. Precision Laboratories, LLC warrants that this material is reasonably fit for use as specified on this label. No agent or representative is authorized to make any other representations concerning this material. Unforeseen factors beyond Precision's control prevent elimination of risks in connection with the use of its chemicals. Such risks include, but are not limited to, damage to plants and/or crops to which the material is applied, or lack of complete control and damage caused by drift to other plants or crops. Such risks may occur even though the product is reasonably fit for use as stated herein and even though label directions are followed. Follow directions carefully. Timing, mixture, method of application, weather and other conditions are influencing factors in the use of this product and are beyond the control of the seller. Except to the extent prohibited by applicable law, the exclusive remedy of the user or buyer and the limit of liability of the company or any other seller for any and all losses, personal injuries or damages resulting from the use of this product, shall be the purchase price paid by the user or buyer for the quantity of product involved.
