

ENDURON PSI™

MARKING FOAM FOR PRESSURIZED FOAMERS

LONGEST LASTING MARKING FOAM

ENDURON PSI is specifically formulated to maximize marking foam performance by generating greater volumes of heat-stable marking foam under a wider range of operating pressures than ordinary synthetic marking foams.

ENDURON's high expansion formulation produces large volumes of thick, long-lasting foam that allows applicators to drop more foam at higher application speeds. In side-by-side field tests, ENDURON PSI has outlasted competitive marking foams by over 50%.

ENDURON PSI BENEFITS

- Superior longevity under extreme conditions.
- Resists splattering caused by high operating speeds and pressures
 - Produces thicker dollops under a wider range of operating pressures
- High expansion formulation generates greater volumes of foam
- No need for additional softening agents
- Dye tolerant
- Easy to store
 - Freeze/thaw stable

USE ENDURON PSI

With Tracer™ Marking Foam Colorants available in Hot Pink, and non-staining Cool Blue.

Tracer Marking Foam Colorants are specially developed dyes that improve foam visibility under a wide range of crop and residue situations.
