

INTACT™ MAXX

*VOLATILITY REDUCING &
WATER CONDITIONING AGENTS, DRIFT
RETARDANT AND RETENTION AID*

INTACT™ MAXX is a unique multifunctional adjuvant premix specifically designed for use with dicamba-containing tank mixes. INTACT MAXX uses a unique plant-based, shear-resistant polymer that improves pesticide performance on a wide range of weed species by increasing adhesion and retention of large spray droplets to the leaf surface. INTACT MAXX is recognized as a qualified and approved DRA for dicamba-based herbicide tank mixes. Always check manufacturer labels and websites for confirmation.

FEATURES:

- Enhanced all-in-one premix that includes a new volatility reduction aid based on VOLIMINATE™
- Approved for use with new dicamba formulations by Bayer, BASF and Syngenta
- Built from the plant-based drift reduction and retention aid used in INTACT™ and INTACT™ ADVANCED
- Includes a non-AMS based water conditioner safe for use with dicamba
- Can be used with any dicamba-containing formulation including popular premixes labeled for corn

USE RATES:

- XtendiMAX®: 7 quarts per 100 gallons of solution or 1.75% v/v
- Engenia®: 7.5 quarts per 100 gallons of solution or 1.875% v/v

PACKAGING:

- 2 x 2.5 gallons per case
- 275 gallon minibulk
