

SALIA™

High Surfactant Oil Concentrate, Deposition Aid and Drift Retardant

SALIA™ is an APE/NPE free high surfactant oil concentrate with built in drift reduction and deposition technology. SALIA is used at 50% of the traditional use rate of ordinary crop oil concentrates or methylated seed oils. SALIA is an ideal tank mix partner for enhancing the performance of a wide range of herbicide tank mixes, particularly under tough or stressful growing conditions.

USE RATES

8–12 ounces per acre

PACKAGING

2 x 2.5 gallons per case

275 gallon minibulk

CERTIFICATIONS

FEATURES

APE/NPE free for improved crop and environmental safety

Creates right sized droplets for increased canopy penetration and better herbicide uptake

Minimizes off target movement

Excellent tank mix partner where MSOs are not allowed

Contains 75% paraffin oil and 25% surfactant

8 oz/acre delivers the same amount of oil per acre as an ordinary HSOC at 10 oz/acre

Approved for use with Enlist One®

Achieving excellent volunteer corn control requires an oil adjuvant. When soybean yields and profits are at risk, it's important to quickly remove what competes for sunlight, space, and nutrients.

SALIA delivered right size droplets with a crop safe surfactant for more coverage, less crop response and more yield.
