

# TARAGON™ ELITE

WATER CONDITIONING AGENT, NONIONIC SURFACTANT, HUMECTANT, DRIFT REDUCTION AND ANTIFOAMING AGENT

TARAGON™ ELITE is a convenient premix of drift reduction technology and water conditioning agents that protects the performance potential of dicamba-based products or tank mixes from antagonistic metal ions found in hard water and leaf tissue while further reducing drift risk. TARAGON ELITE is recognized as an approved DRA for most dicamba-based herbicides. Check manufacturer labels and websites for confirmation.

#### WHAT MAKES TARAGON ELITE BETTER:

- Unique AMS-replacement technology blocks antagonistic hard water ions from reducing herbicide performance
- Improves spray droplet retention, coverage and drift control
- Compatible with specified nozzles for dicamba-based herbicides
- Will not cause an increase in dicamba volatility
- Recognized as an approved DRA for most dicamba-based herbicides

#### USE RATES:

- 0.625% v/v (5 pints) per 100 gallons of spray solution with dicamba-based tank mixes
- 0.5-0.75% v/v (2-3 quarts) per 100 gallons of spray solution with all other tank mixes

#### PACKAGING:

- 2 x 2.5 gallons per case
- 275 gallon minibulk
