

HYDRALINK™

SEED-APPLIED WATER MANAGEMENT

HydraLink™ is a new, innovative seed-applied water management product formulated to provide an optimal moisture environment around the seed for improved germination and emergence, stand establishment and yield. With an improved moisture environment, **HydraLink** also enhances the performance of other seed-applied inputs. It is particularly beneficial when used in combination with seed-applied nutrition products such as Wuxal® Terios Zn⁺, Wuxal Terios Mn⁺ and Wuxal Terios CoMo, where it provides for improved nutrient uptake and use.

HYDRALINK FORMULATION

- Low use rate liquid formulation that provides an optimal moisture environment around the seed
- Easy to handle, low viscosity formulation with good temperature stability
- Excellent slurry compatibility with most seed treatment pesticides and other seed-applied products
- Ideal complement to seed-applied nutrition products on corn and soybeans, as well as rhizobia inoculant on soybeans

USE RATE

- Corn – 1.0-2.0 fl. oz. per 100 pounds of seed (0.5-1.0 fl. oz. per unit)
- Soybean – 1.0-1.5 fl. oz. per 100 pounds of seed (0.5-1.0 fl. oz. per unit)

PACKAGING

- 2 x 2.5 gallons per case

WUXAL® TERIOS ZN⁺ and HYDRALINK™

LINKING UP TO PROVIDE HIGHER CORN YIELDS

7.0

bushel per acre increase with
Terios Zn⁺ and **HydraLink**

47%

increase in vigor with
Terios Zn⁺ and **HydraLink**

Control

Terios Zn⁺

Terios Zn⁺ and HydraLink

The corn yield and vigor results are the summary of eleven small plot 3rd party research trial locations in IL, NE, and WI.
