

# WANT HIGHER YIELDS AND ROI?

## STRETTA™ FOR STRAWBERRIES

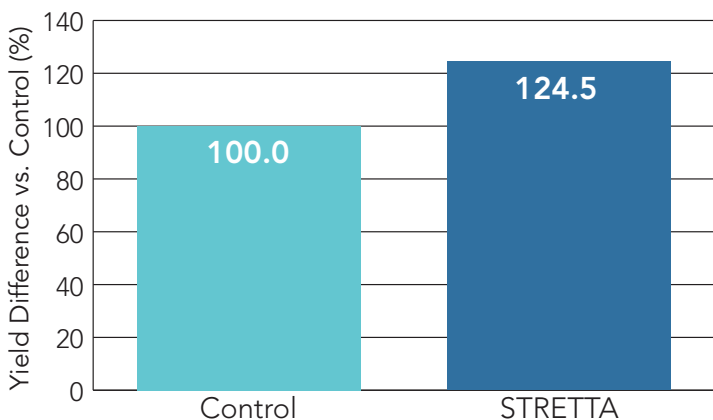

What if you could . . .

increase  
yield?

\$ increase  
ROI?

### FRUIT YIELD

Both treatments included standard grower fertility and irrigation programs

24.5%

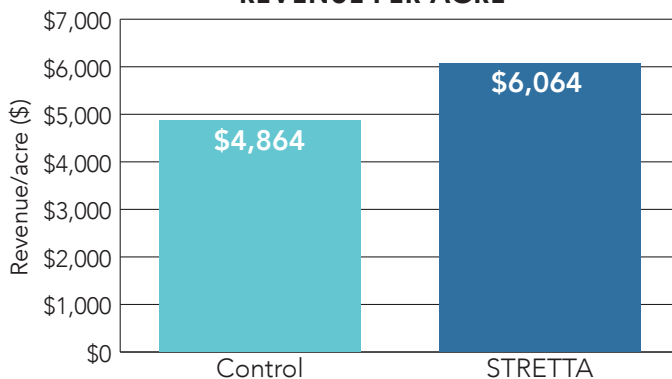

increase in strawberry  
yield with STRETTA

16.7x

ROI or a net return of  
**\$1,128** per acre  
with STRETTA

### REVENUE PER ACRE

Research was conducted by Al Herndon with Agri-Help Inc. in a commercial field of strawberries in Citrus County, FL in which STRETTA was applied through the drip irrigation system. Five applications were made at three-week intervals in fine, sandy loam soil. The first application was 2 quarts, followed by four 1-quart applications. Irrigation was applied at the grower standard for 60 minutes once or twice per day depending on the environmental conditions. Strawberries were harvested ten times over the two-month period beginning in early December through the end of January. Revenue calculations were made based on the strawberry market pricing at the time when the trial was conducted.
