

# WANT TO INCREASE GRAPE QUALITY?

## STRETTA™ FOR TABLE GRAPES

What if you could . . .

Increase sugar content?

Increase berry weight?

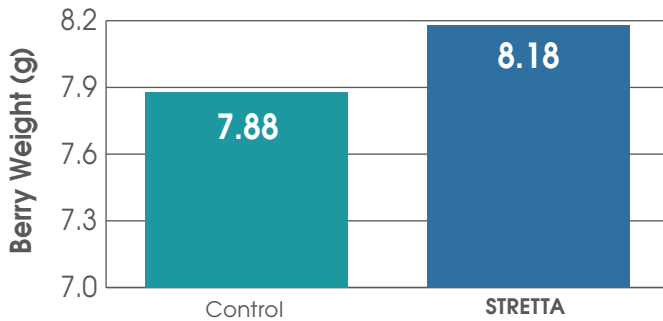

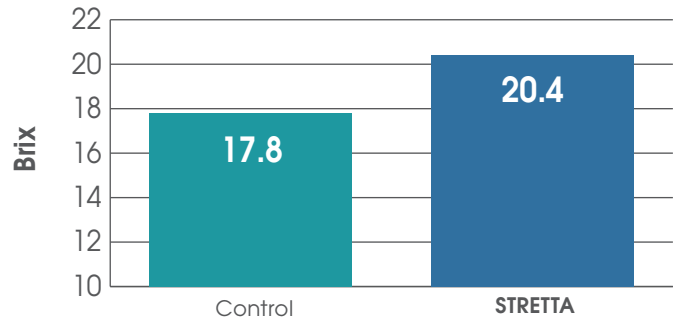

Reduce soil sodium?

14.6%

Increased sugar content with STRETTA

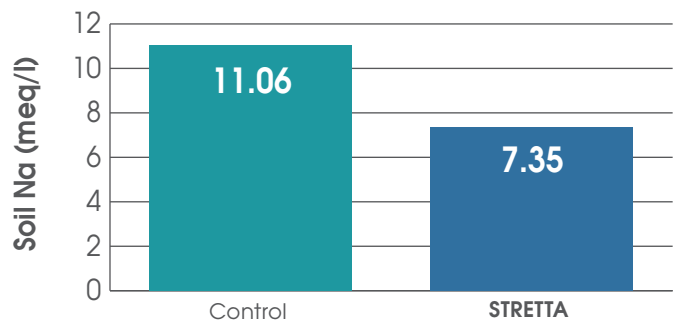

3.8%

Increased berry weight with STRETTA

33%

Reduced soil sodium with STRETTA

Research was conducted over a two-year period by Dr. Ashraf El-kereamy, University of California Cooperative Extension, on Scarlet Royal table grapes grown on a sandy loam soil. STRETTA was injected through drip irrigation at a rate of 2 quarts per acre in 3-4 week intervals for a total of six applications each season.
