

STRETTA™

ON TOMATOES

What if you could make **\$4,375*** more per acre? And . . .

increase yield?

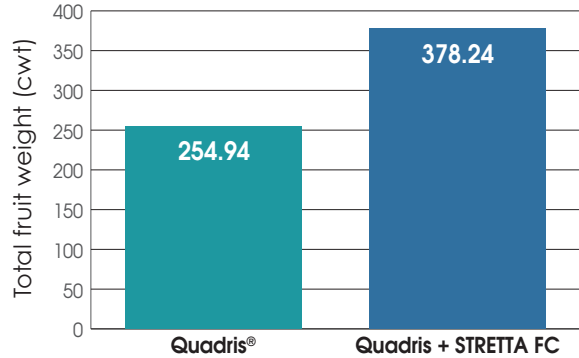

improve disease control?

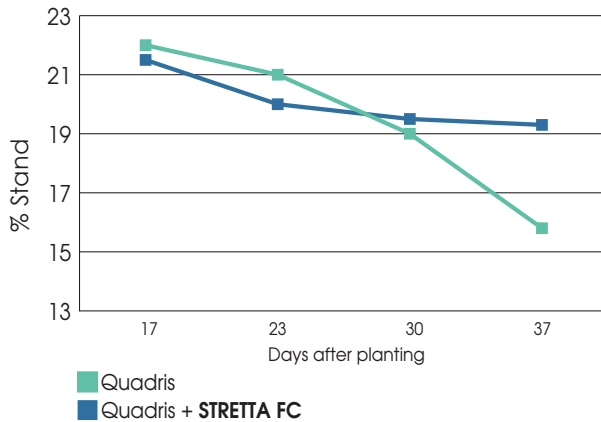

improve plant health?

48%

increase in total fruit weight with STRETTA

Control of Fusarium Wilt on Tomatoes

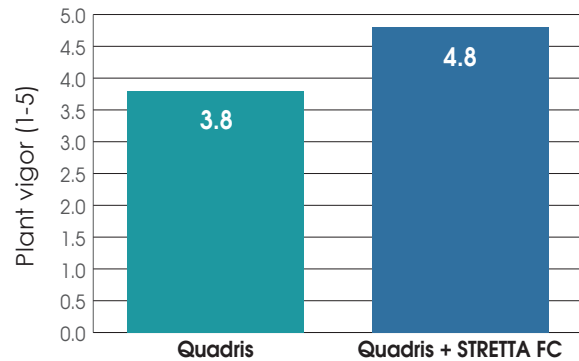

22%

better disease control with STRETTA after 37 days

26%

more vigorous plant growth with STRETTA

This trial was conducted by a third-party researcher in Brooks County, GA with fresh market tomatoes on sandy loam soil. STRETTA was applied through drip irrigation at 2 qt. per acre with 9 fl. oz. of Quadris every 3 weeks, for a total of 4 applications. *Based on May 2019 fresh market tomato price per cwt. and average product price.
