

# WANT HIGHER YIELDS?

## TOLERO™ FOR STRAWBERRIES

**What if you could . . .**

**Increase strawberry yield?**

**16%** 

increase in strawberry  
yield with TOLERO

A strawberry crop in Citrus County, FL was treated with TOLERO in the drip irrigation system. Four applications were made at three-week intervals in one, sandy loam soil. Irrigation was applied at the grower standard for 60 minutes once or twice per day. The initial TOLERO application was 1 quart per acre, followed by applications of 1 pint per acre. The result was a total fruit yield increase of 443g/plot, an increase of 16%.
